What Ambit is building

Ambit is a verification-first operating layer for accountable cross-border payments and stablecoin settlement. It starts with a controlled Australia-origin settlement route and is designed to extend, corridor by corridor, into eligible multi-currency collection, FX and payouts to approved fiat bank accounts.

Important operating boundary

AUSTRAC registration is for AML/CTF purposes. It is not endorsement, product approval or an Australian Financial Services Licence. This brief does not conclude whether any particular asset, transaction or service is a financial product or financial service. Ambit is not a bank, and corridor availability remains subject to eligibility, verification, jurisdiction, partner readiness, regulatory review and internal approval.
